Research Interests

Insurance, Climate Finance, Financial Intermediation, Demand-Based Asset Pricing

Education

PhD in Finance, *Rotterdam School of Management, Erasmus University* 2022 – 2027 (exp.)
Internship: International Monetary Fund (Jun – Aug 2025)
Member: Erasmus Initiative *Dynamics of Inclusive Prosperity*
Summer school: Causal Inference, *Northwestern University*

MSc in Economics **cum laude**, *Tilburg University* 2018 – 2019
Track: Sustainable Development

BSc in Economics and Business Economics, *Tilburg University* 2013 – 2017
Competitive rower with top-sport status (2013 – 2018)

Visiting

Visiting PhD student at *University of California San Diego* Fall 2026
Host: Prof. Judson Boomhower

Visiting PhD student at the *Stockholm School of Economics (House of Finance)* 2026
Host: Prof. Marcus Opp

Visiting BSc student at *Universidad del Pacífico*, Peru 2016 – 2017

Job Market Paper

1. A Theory of Optimal Disaster Insurance under Intermediary Constraints
   PRESENTATIONS: *ERIM PhD Seminar, University of California San Diego (scheduled)*

   Abstract: Implicit insurance subsidies in housing markets protect households from rising weather damage but constrain insurers financially, undermining the long-run availability of insurance. Using a dynamic housing model calibrated to the California housing market, I characterize the optimal time-consistent insurance allocation that protects housing values while limiting insurance market crashes after disaster shocks. The severity of these crashes is governed by the economy-wide marginal propensity to insure. I decentralize the social planner's optimal allocation with an insurance subsidy whose magnitude varies with household leverage and the likelihood and cost of binding insurer capital constraints in the future. The model reveals that: (i) while a subsidy on insurance is optimal in most states, its magnitude lowers when high insurance demand coincides with a high probability of future insurer net worth collapses, (ii) a regulator influencing insurance prices directly reduces welfare as it generates persistent under-insurance. I further provide empirical evidence consistent with insurer financing constraints amplifying insurer withdrawals from insurance markets.

Working Papers

1. The Informational Role of Sustainable Investors
   with Marta Szymanowska (Erasmus University)
   AWARD: *Semifinalist, FMA Annual Meeting Best Paper Award 2025*
   PRESENTATIONS: *CUNEF University Madrid*, FMA Annual Meeting, French Finance Association Conference, Erasmus DoIP Seminar, Tri-City Bridge Workshop, ERIM PhD Seminar*
2. **Financial Stability and Natural Disasters under Endogenous Adaptation**
   with Christina Kolerus (IMF) and Joana Pereira (IMF)
   PRESENTATIONS: *Banque de France, Stockholm School of Economics, IMF*
   Draft coming soon

Policy Contributions

1. **Insuring against Natural Disasters**
   with Zamid Aligishiev, Christina Kolerus, Junghwan Mok, Joana Pereira, and Svetlana Vtyurina
   IMF Departmental Paper

Publications

1. Hiding in Plain Sight: The Concept of Fiduciary Duty in Financial Economics
   with Conrad Heilmann (Erasmus University) and Marta Szymanowska (Erasmus University)
   Journal of Economic Methodology, 2026

Employment

PhD intern at the *International Monetary Fund* — Jun – Aug 2025
Research on insurance markets in the Americas

Associate at *Aon*, Strategy and Technology Group — 2021 – 2022
Advisory services to global insurance companies using data and analytics

Consultant, Emerging Markets, *Larive International* — 2019 – 2021
Business development in high-growth markets (Sub-Saharan Africa and South-East Asia)

Awards

2025 Semifinalist, FMA Annual Meeting Best Paper Award
2019 Finalist, Jan Brouwer Thesis Award
2019 MSc Economics cum laude, top 5% of the class, Tilburg University

Teaching

MSc thesis supervision, Finance & Investments, *RSM* — 2022 – 2026
Main supervisor of 15+ students
Evaluations: **5.0/5** (2025), **4.5/5** (2024)

Teaching assistant in Investments II (MSc), *RSM* — Fall 2025

Financial Modeling (MSc), *RSM* — Fall 2024
Workshops on option pricing, hedging, and volatility models
Evaluation: **4.2/5**

Teaching assistant in Financial Modeling (MSc), *RSM* — Fall 2022, 2023

Teaching assistant in Corporate Finance (MSc), *RSM* — Fall 2022

Seminars, Conferences & Workshops

2026 Banque de France, Stockholm School of Economics, ERIM PhD Seminar, University of California San Diego (scheduled)
2025 CUNEF University Madrid (by co-author), FMA Annual Meeting, International Monetary Fund, French Finance Association Conference, Erasmus DoIP Seminar, Tri-City Bridge Workshop, ERIM PhD Seminar
2024 Dutch Financial Economics of Climate Change Workshop, ERIM PhD Seminar

Discussions

2025 "The Cost of ESG Rating Uncertainty" by Elise Gourier and Menglong Na, *French Finance Association Conference*
2023 "Reflections on the 2022 Nobel Memorial Prize Awarded to Ben Bernanke" by J. van 't Klooster, *Erasmus Institute for Philosophy and Economics Research Seminar*

Academic Service

Referee for the *Journal of Risk and Insurance*

Languages, Skills & Interests

LANGUAGES: Dutch (Native), English (Fluent), Spanish (Intermediate, B1 certificate), German (Basic)

PROGRAMMING: Python, R, Stata, LaTeX

INTERESTS: piano, kitesurfing, mountain biking, and reading.
